SUMMARY

Full Stack Developer with 2 years of hands-on experience developing scalable web applications using React, Next.js, Node.js, MongoDB, and Laravel. Experienced in collaborating with business units, regional offices, and technical stakeholders to translate operational requirements into efficient digital solutions. Successfully contributed to process improvements that reduced turnaround time by 30% and enhanced service delivery.

SKILLS

Laravel, NextJs, Javascript, MySql, Tailwind, GIT, Github, Restful API, AI-Assisted Development Tools, Typescript, API Integration, Problem-Solving, Analytical Thinking, Adaptability, Time Management, Cross-Functional Collaboration

EXPERIENCE

IT Support Officer II — Department of Human Settlements and Urban Development

Oct 2024 -

- Developed and maintained five web-based systems supporting DHSUD Central Office and 17 Regional Offices, streamlining operations and improving service delivery.
- Built and maintained eCitizen, a centralized request and complaint management system serving 200+ personnel across DHSUD's Public Assistance Division and Regional Offices, processing over 1,500 stakeholder requests and complaints monthly.
- Developed DARTS/Service Desk, an IT ticketing and support management system serving 700+ users across DHSUD offices and managing 500–1,000+ support tickets monthly.
- Collaborated with cross-functional teams, regional offices, and technical stakeholders to translate business requirements into scalable digital solutions, optimizing workflows and enhancing operational efficiency.

Full Stack Developer — Freelance

Aug 2025 - Nov 2025

- Designed and developed a web-based management system integrating QR code scanning, library management, procurement tracking, analytics dashboards, and automated reporting to streamline workflows and minimize manual processes.
- Managed the end-to-end software development lifecycle (SDLC), including requirements gathering, database design, development, testing, deployment, and post-deployment support, improving reporting accuracy by 25%.

EDUCATION

Bachelor of Science in Information Technology — Quezon City University, Quezon City

2024 | GPA: 1.45

PROJECTS

Library Management System

Developed a comprehensive library management system featuring book cataloging, member management, and circulation tracking.

Streamlined cataloging workflows, reducing book processing time by 70%.

Technologies: Laravel, Vue.JS, MySQL, Hostinger

RealEstate Chain

Developed a multi-tenant real estate platform integrating blockchain-based ownership verification, rental management, KYC workflows, and payment processing through Stripe and PayMongo.

Implemented features supporting secure property transactions, tenant management, and streamlined rental operations.

Technologies: .Net, React.JS, PostGreSQL, Netherium, SmartContract

ATS Resume Platform

Built an ATS-focused resume builder featuring real-time resume previews, AI-assisted content generation, automated ATS scoring, and in-browser PDF export.

Developed interactive resume editing and analysis features to help users create structured, ATS-friendly resumes.

Technologies: React 19, TypeScript, Zustand, Vite, Framer Motion, jsPDF
